CARDBOARD DESCRIPTION

White coated microflute with a weight of 210 grams. Wellenstoff has a weight that can vary from 90 grams to 105 grams.

The white linerboard has a weight that can vary from 120 grams to 125 grams.

Corrugation coefficient: 1.30

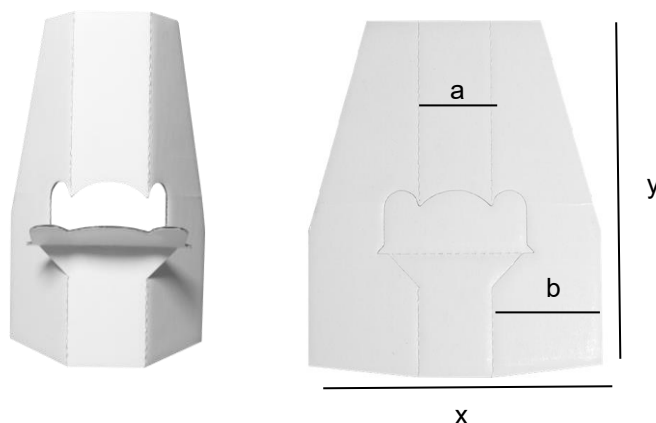

Grams per square metre of adhesive: 6

Cardboard weight: approx. 453 g/m²

We certify that the corrugated cardboard is made entirely from recycled paper or pure cellulose, with wheat starch used as the adhesive.

The technical data sheets for the papers relating to the requested compositions are sent as examples, as different paper mills are used for production and we reserve the right to use equivalent papers.
